

Subject: Issuance of a Basic Ordering Agreement, and delivery orders thereunder, for repair of various items in support of the Optimized Top Owl helmet system on the H-1 Helicopter.

This is a combined synopsis and sources sought notice. Naval Supply Systems Command Weapon Systems Support (NAVSUP WSS) Philadelphia intends to solicit Thales Defense & Security Inc. (23386) located in Clarksburg, MD for repair of 24 components on the Optimized Top Owl system (OTO) in support of the H-1 Helicopter under the authority of Federal Acquisition Regulation (FAR) 6.302-1, "Only one responsible source and no other supplies or services will satisfy agency requirements." Thales Defense & Security Inc. is the only known source willing and able to perform repairs on these items. The Government does not have the technical data or data rights to develop new sources, or conduct competition, for these repairs. The estimated award date for this BOA is December 2016. The contemplated duration of the BOA is three years.

The following is a list of part numbers and estimated yearly quantities to be repaired:

NSN	P/N	Nomenclature	YR 1	YR 2	YR 3
5975-145651782	C19225CA	Box Connector, Elect	10	11	12

The applicable NAICS code for the above items is 335931, 334310, 334511, 336413, 334419 and 334413.

While the Government only currently has the above-named source for repair of these items, in the event, unbeknownst to the Government, another source has the technical data and data rights to perform this work, potential interest in such repairs by another source or other sources would be welcome. In addition, because the items are considered critical to flight/mission (critical application items), any other interested sources will be required to submit and have approved a Source Approval Request (SAR) package in order to be eligible for repair work for these items. A SAR brochure describing the process for SAR submission and approval is available at https://www.navsup.navy.mil/navsup/ourteam/navsupwss/business_opps. It should also be noted as to this contemplated repair BOA and delivery orders, in the event a source were to obtain technical data and data rights necessary for repairs from the current repair source, the time required for approval of a new source is normally such that award cannot be delayed pending approval of a new source. Thus a future SAR approval, if received, may be useable for future repair requirements for these items.

For information or questions regarding this notice, please contact Ms. Olga Maksimchuk, Contract Negotiator (Code N731.17) by e-mail Olga.Maksimchuk@navy.mil or phone (215) 697-3111.
